

## Abstract

Subject of this thesis - “Attitudes of selected groups of student of medical fields to euthanasia” – is the issue of euthanasia. Also palliative and hospice care is discussed. The bachelor’s thesis is divided into two parts – theoretical and empirical.

The theoretical part covers general information about euthanasia, lenitive and palliative care.

Empirical part deals with reconnaissance survey, which took place among students of bachelor’s degree program General Nurse and General Nurse with an extended education in pediatric nursing and master’s degree students of General Medicine.

I consider the primary objective of this thesis to determine students’ attitude of above mentioned programs to the issue of euthanasia and other associated issues. Further to determine knowledge of terms regarding palliative and hospice care.
