

The annotation

I considered with the topic The European enlightenment of the 18th century in my labour. I considered with the universal characteristics of the ideas of the enlightenment. I focused on the idea of civilization, the meaning of the peace in the philosophy of the enlightenment and the swing of the enlightenment to rationality. I considered with the conditions of peace in Europe, more perfect forms of control of public things, religious toleration and the idea of the common european market. I considered with the opinions of the individual enlighteners in England, in France and in Germany. I concentrated to the opinions of John Locke, Francois Marie Voltaire, Immanuel Kant and Johann Gottfried Herder.
