

The aim of my work will be case study. Within the study I will try to take up the constructive elements of education at two different teachers at different schools. The sighting I will do across my own previews at these two schools. Every school is represented by one teacher. Every teacher represents the approaches which rests in different including of element of constructive education at the education of geometry. My essay will be made to main chapters which will reprezent each part of my sighting. Every part will be developed to more detailed analyzist. Each part will be closed by own suggestion of my lesson.
