

This thesis Behavior Problems in Preschool Children: Comprehensive Approach to Solving Problems deals with problems of behavioral disorders in preschool children.

The theoretical part deals with the problem definition ADHD, diagnosis in general and specifically for the diagnosis of preschool children, psychotherapy and medication. Also deals with families with children suffering from hyperkinetic disorder.

The practical part is focused on parents of preschool children and their awareness of behavioral disorders. The research analyzes the knowledge of parents of hyperkinetic disorder, their view of what we understand under the term undisciplined child. In addition, figuring out who to turn to parents who seek advice and help with problems with their child's education.
