Abstract

The work deals with the relationship of a young man to drug addictions, what high school student is the term "addiction" and "drug", or coming into contact with drugs, and so as to be able to resolve the issue and how to cope with it. At first I was writing about risky behavior in different areas of life factors, and not least addictive drugs, and dividing their effects on the body. In the second part, I analyzed the questionnaire focused on the relationship young people to drug addictions and to compare students with medical and paramedical focus. The last part is devoted to various proposals for improving the prevention against drugs and the end of the dissertation.
