

ANNOTATION

This thesis is a description of low-threshold facilities for children and youth. The aim is to compare the progress of work with clients in two centers existing standards of quality social services that the Ministry of Labour and Social Affairs, is for staff of the facility as a guide on how quality in their facilities to fulfill. They are also a means of ensuring a defined level of quality control members, each NZDM – as I discovered during my research, a differentiated approach. I chose the following methods work: creating a description of the work with the client based on case reports, documentation analysis and interpretation.

KEY WORDS

Low-threshold facilities for children and youth, streetwork, children, youth, social work
