

ABSTRACT

In my bachelor thesis I will concentrate on the evaluation of information on employment of people with the visual impairments in the 19th - 20 century, especially through the activities associations for the blind and institutes of the time. I also mentioned the historical evolution years of the 19th - 20 century, because of the blind understand the life situation and understand the reasons for the formation of blind associations, which concentrate on job placement of person with visual disabilities. Next I rate the traditional crafts, that were typical for people the with visual impairments.
