

## **Annotation**

The bachelor paper "Social analysis of the indebted citizens in Prague 3" focuses on the issues of indebtedness, respectively overindebtedness, its causes and consequences for single person, or the whole population. The essay tries to answer the question about the origin of overindebtedness, options of its solution and prevention. The theoretical part deals with the issues by historical aspect and the law aspect too, mainly is focused to the execution of the decision carried out by sale of movable things, and advise for individuals. The research part works with the question, which segments of population the indebtedness concerns at most, by the aspect of gender, age, employment, nationality and education, focused for Prague 3.
