

Abstract

Topic of my thesis is Involving school children in activities of sports club in Beroun. My labor objectives are establishment and evaluation of current situation of free time spending of older school age children in Beroun.

I want to find out, which sport clubs are preferred by children of mentioned age, if there is enough of these clubs and which sport club is missing in Beroun.

I have formed following questions based on this problem:

- Is in Beroun enough of sport clubs for older school age children?
- Which sport clubs older school age children visit?
- Do children visit more sport clubs or other hobby clubs?
- Why do children visit sport clubs?

My labor consists from theoretical part, where I am dealing with structure and definition of free time, sport, age categories and characteristic of several chosen sport clubs in Beroun.

The other part is research, where based on evaluation of questionnaires I compile charts and graphs, according to them I will answer questions posed in labor problems and evaluate the hypothesis. I can state, that based on my research are 3 hypothesis approved and one disproved.

Based on evaluation of my research I conclude following:

- There is enough sports clubs for older school age children in Beroun and most of them, 47,4% of all asked children, are satisfied with current offer.
- Most often children from sixth grade visit dancing sport club, children from seventh grade ball games and from eighth grade other sport club, then from my list.
- Most of the children visit just one sport club.
- Main reason, why children visit sport club is, that they enjoy it. This answer chosen 84,6% of all respondents.
