Abstract

My dissertation deals with some aspects which are connected with tax kontrol. The main point of my paper is to give a detailed description of selected aspects and to compare them according to an old and a new version of legal adjustment. An introductory chapter pays attention to defining tax control. Following chapters deals with the opening of tax kontrol, repeated tax kontrol, periods for tax setting, kontrol report and means of protection duty in the tax control. My own practical experience with tax kontrol is written about in the last chapter.
