ABSTRACT

The subject matter of this bachelor's work is EU projects implementation in 2007-2013 period and grant acquisition in education with focus on primary schools in Opava region. The first part briefly characterizes regional politics and its application in the Czech Republic. Next part overview particular operating programmes with profound view on operating programme Education for competitiveness, out of which is realized the call „EU money for schools“, intended to improve conditions for pupils and teachers at primary schools outside Prague. This is followed by specific example of detailed analysis of project cycle during EU grant application in support area 1.4. The aim of my bachelor's work is to analyze the situation in primary schools in Opava region in terms of EU projects involvement, grant success rate and their implementation into school practice with detailed focus on „EU money for schools“ project. The research summary of questionnaires, phone inquiries and structured questions together with conclusion and recommendations are presented in the final part.

Key words:

Regional politics, operating programmes, EU projects, implementation, applicant, project application
