

Věra Sušická – Diplomová práce 2012

Anglický překlad

The final work is concerned with the remains of dwelling in the context of Funnel Beaker culture. It is divided into five basic regions. In general these regions are consisting of south Scandinavia, the Netherlands, Germany, Poland, Bohemia, Lower Austria and west Ukraine. 76 localities were obtained from all these regions. There was proof of more than 160 dwellings (Underground/dig houses, post hole houses). Particular types of dwellings and their functional characteristics were described typologically and chronologically. The finds were scrutinized, especially the czech ones. This work also further discusses the issues of the survival process of mentioned dwellings and the ways of evaluation and research.

Klíčová slova: Funnel Beaker Culture –Central European context – dwelling structure – post hole houses – dig houses
