

## ABSTRACT

**Title:** Targets used at the first modern Olympic Games and in the period of the turn of the 19th and the 20th centuries.

**Aim of Thesis:** The aim of this thesis is to describe the development in individual targets in the period of the turn of the 19th and the 20th centuries. The climax should feature the discovery and description of target evaluation at the first modern Olympic Games in 1896.

**Method:** The thesis subject is an analysis of shooting evaluation in a defined period. The methods used for this analysis are data secondary analysis, induction and abduction.

**Results:** Based on the above mentioned methods there were totally five targets of five concentric circles discovered. These targets could have been used for rifle disciplines at the first modern Olympic Games. The values of individual targets were as follows: 1<sup>st</sup> (10, 21, 33, 46, 60), 2<sup>nd</sup> (11, 23, 36, 50, 65), 3<sup>rd</sup> (12, 25, 39, 54, 70), 4<sup>th</sup> (13, 27, 42, 58, 75), 5<sup>th</sup> (14, 29, 45, 62, 80).

**Keywords:** shooting sport, pistol disciplines, rifle disciplines
