

Abstract

In my Bachelor thesis I would like to dedicate the Sea Peoples, which were nations that threatened Eastern Mediterranean about 12 century BC. I would like to clarify the situation in Eastern Mediterranean before the arrival of the Sea peoples and especially in Hittite Empire, Egypt and Aegean area and focus on sources of informations, which we have about the Sea Peoples. Because we survived almost no archaeological evidence, I will work especially with sources, which left behind countries that affected invasions of Sea Peoples. I would like to pointed that Sea Peoples were not only one nation, but it was different ethnic groups of different cultures which joined and looted. Also I did not want to miss consequences of attacks Sea Peoples for some countries of the Eastern Mediterranean, because for some states these consequences were fatal.

Keywords

Sea peoples, Ramesse III, Egypt, Philistines
