

ABSTRAKT

Employment of Turkish Women

The causes of underemployment and unequal representation of women in the various economic sectors in Turkey should to be taken as a complex and interdisciplinary problem. This paper provides a summary of basic knowledge on the issue of Turkish women who are trying to succeed professionally. Analysis of statistical data of a certain period of time is a part of the employment survey. The history of the women's movement is introduced in order to understand the position of women at present-day Turkey. The particular aim of the thesis is to outline the differences in employment between men and women in Turkey.

Keywords: women, employment, women's movement
