

## **ABSTRACT**

### **Theme: Child's life in a foster care**

This Bachelor Paper deals with the points at issue of a foster care, especially living together of foster parents and a child with educational problems taken into care.

The goal of this Bachelor Paper is to introduce problems of foster care and show a real case of a child with educational problems and show how this situation is solved in this family. The Paper should provide an answer to what factors could affect educational problems of the child.

The Paper is divided into two parts, theoretical and empirical ones. The theoretical part is devoted to a description and history of foster care forms in the Czech Republic. It also deals with living together – its preparation, making relations, etc. and subsequent living together – a child's in a foster family development, bringing up, relationships, surroundings, etc.

In the empirical part there is a qualitatively focused research in a form of case Study, where an unstandardized interview, an observation and a study and analysis of documents are a tool of data collection.

Roma origin, and a passive approach, comfort, laziness, emotional explosiveness, looking up to friends with troublesome behaviour and the age of puberty which intensified the above mentioned have been revealed as the main cause of creation of educational problems of the child in the case study of the carried out research.
