

ABSTRACT:

The bachelor thesis deals with the educational needs of nursery school headmasters in Prague. The aim was to find out the contemporary educational needs of the stated group of leading workers and compare them with topical educational offers on the territory of the capital city of Prague.

Theoretical part comes from the professional literature concerning the nowadays pre-school available educational and other sources and others. Researching part was based on questionnaire studies and its further analysis. The result is to create the whole side of further education of nursery school headmasters concerning their demands.

At the end of the bachelor thesis the headmasters' interests of further school management education are confirmed and the time limited possibilities of headmasters are pointed out. The author of the thesis also shows the inadequate educational offers and the lack of wrong adjustment of the whole system of managerial education in our educational system.
