Summary:

The bachelor thesis deals with the lifestyle of military nurses in peacetime and military conditions.

The theoretical part informs about health and lifestyle. The thesis is devoted to military nurses and their lifestyle. The military medical service and Field Hospital of the Czech republic Army are described and at the end of the theoretical part there is a sort description of Afghanistan and life in it included.

The main content of the thesis is a quantitative survey using an anonymous questionnaire and qualitative interview with a military nurse. I was interested in the lifestyle of military nurses and their homeland and its change when on a foreign military mission.

The research sample consisted of professional soldiers, particularly military nurses, members of the 6th and 7th Field Hospital of the Czech Army.
