

## **Abstract**

**Title:** Comparison of Outdoor Education at Czech and Norwegian Universities

**Goals:** The main goal is to compare outdoor education at Czech and Norwegian universities.

**Method:** We used a retrieval method of internet and literature sources of study programmes at certain universities and we have composed and summarized a survey, which had been sent to students of researched schools.

**Results:** We can observe certain differences in Czech and Norwegian interpretation of outdoor education, which is deeply influenced by cultural-historical development in both countries and different point of view of perceiving the environment.

**Key words:** outdoor activities, friluftsliv, study program, comparison
