

## **Abstract**

The bachelor thesis introduces and describes in detail selected non-European national digital libraries, compares them with each other and compares them with European digital libraries and outlines their relationship to mass digitization projects.

The introduction is dedicated to explaining basic terms. The project description is focused especially on user accessibility, materials in digital collections and cooperation at the national and the international level. A vital part of comparison is also the graphic comparison of quantitative data.

## **Key words**

Digital libraries, national libraries, digitization, digital document
