

ABSTRACT:

The target of this diploma thesis has been to process the development of Multileveled School in Jičíněves (district of Jičín) and to demonstrate benefit of the acquired knowledge for school work. The theoretic part devotes to the study of Jičíněves school commemorative books and in a wider view also whole Jičín region. Insight into the development, present position and perspective of the elementary education in the Czech lands with the focus on multileveled schools goes before these chapters. Historic methods and document content analysis has been used for this work. The practice part describes the project realized with pupils of primary school age. Its target has been to acquaint the pupils with history of the school in Jičíněves through activated methods and to impress on their attitude to the school and the place they live. Survey of present situation and perspective of multileveled schools in Jičín region including the school in Jičíněves has been done through the questionnaires and interviews. Vitality of the multileveled schools has been evaluated by analysis of the result.
