

## Abstract

Title: The organization of tournament within the scope of handball education at primary school.

Objectives: The main objective of this thesis is to verify how different organization of handball tournament affects the efficiency of teaching or what type of tournament is more interesting for pupils and which one they would prefer themselves. Another objective is to determine whether the pupils would be interested in annual organizing of tournament. Our task is to organize two different tournaments, knock-out tournament and group tournament. By using the questionnaire method we get the information which consequently evaluate and use for determining of the conclusion of this thesis.

Methods: We used questionnaire method and comparison method in this thesis. We applied questionnaire method in analysis of particular tournaments and comparison method in comparing of tournament responses.

Results: We discovered that the tournament organized by group method is more efficient for pupils than the knock-out tournament. We observed the same result by organizing the annual tournament where the pupils were also more interested in group tournament.
