ABSTRACT

Dissertation deal about integration poetry with locomotion in kinderkarten. I investigate measure of interest the children about poetry and integration poetry with locomotion. I suppose, the children will be prefer the integration of activities because of congenital needed and complex perceive. I engage characteristic of poetry and locomotion, relation the children to poetry and importance poetry and locomotion for children. I implement the exploration in Prague 1 with twenty children. They are five years old. The method of exploration is observation and experiment. The exploration remain ten days. I investigace measure of interest about poetry and integration poetry with locomotion. I discovered, that I connect poetry and locomotion, the measure of interest increase to seventeen percent. Thanks to, the children love poetry and get to poetry deep emotional relation. Integration poetry and locomotion attend to harmonious development of personality. I think, that it ensure the best start for life.
