

This thesis „The Options of the Non-Governmental Organizations in the Substitutional Family Care“ deals with the description of the roles, functions and options of the non-governmental organizations in the field of the substitutional family care. First objective is to create a list of these organizations. Next objective is a description of the substitutional family care system as well as a description of the roles and options of the nonprofit sector in this field from the non-governmental organization’s employees point of view. This description is based on the analysis of interviews with these employees as well as the employees of the governmental organizations from this field. This thesis also focuses on the collaboration in the substitutional family care system. The last part offers a summary of the outcomes and some recommendations for the improvement of children at risk assessment system.
