

In my diploma work I am dealing with problems of abusing addictive substances. I have collected basic information concerning this problems, I am paying attention to a drug situation and the possibilities of the preventive strategies for pupils of younger school age. I am aiming at region Velkomeziricko, where I am mapping the situation of abusing addictive substances among the pupils of the fifth classes at primary schools. To form my own proposal of the preventive programme determined to pupils of the first grade of primary schools I am using information and knowledge gained by study of literature, visiting different institutions and evaluation of my research. I would like to contribute to improving the problems of drug abusing with this proposal of programme.
