

Author: Josef Dufek, University Faculty & Department: Charles University, Faculty of Arts, Institute for Prehistory and Early History, Title: Neolithic and early Eneolithic activity in elevated dwellings and hill forts in Central Bohemia, Supervisor: doc. PhDr. Miroslav Popelka, CSc., Number of characters: , Number of appendices: , Number of cited references: .

The goal of this Master's paper is to compile previous findings on mesolithic, neolithic and early chalcolithic living areas and archeological evidence on fields, valleys and heights of the Prague plateau. An analysis of archeological material published to date on detected areas and an evaluation of their mutual calculated relationships within the frame of the region and microregions and within the frame of peace and war usage of the landscape are presented.

Keywords: neolithic – early eneolithic – fields position – valleys position – heights position – settlement area – settlement makroarea – settlement mikroregion – settlement region – Prague plateau
