

To discover the possibilities of children's experience with the language of Art from the very pre-school age and the purposeful application of the new educational methods also through the alternative (electro-digital) medium. To present the possibilities of Art activities in kindergarten through different Art media, especially digital photography, and above all to show a scale of those approachable instruments which could be accessible within the natural life in a pre-school collective, including electronic media. To create and implement a new Art project, based on the particular Art activities focused on work with digital photography. To implement personal intentions and opinion into the specific programs. To compare the final outputs of the Art activities of teachers and children. To evaluate the acquired findings as well as experience of implementation of Art activities.
