

Abstract:

Title: Bullying from the viewpoint of teachers and students at the selected elementary school.

Abstract: This paper presents views and observations on the subject of bullying from the viewpoint of teachers and students of the second level of a selected elementary school in Prague 6. The theoretical section contains definition of basic terms. Organisation of the selected school in Prague 6 is described. Research forms a major part of the Thesis. Surveys were carried out by means of questionnaires, observations and interviews. Results show a positive climate at the school created by teachers. Aggressive behaviour is not overlooked and is dealt with by each teacher individually. The elementary school cooperates with a citizens group Prev-centrum which prepares preventive programs for individual classes. Bullying does take place at the school but at a much lower level than presented by media and what is common at some other elementary schools.

Keywords: bullying, aggression, bullying prevention, preventive programmes, solution of bullying
