The Grace Working in the States of Life

The work proceeds with the view of God's grace as the special gift for each state of life. It comes from the fact that man, without God, who created him was not anything that was created by God. Without his grace could not even reach salvation. It treats also basic division of the grace to ,sanctifying grace and sacramental graces. The work of grace in human life is discussed in the section calling and election. Implementation of life in grace is developed in four states of life: lay, consecrated, the ministerial priesthood and married state.

The work tries to show the greatness and effectiveness of the gift of God's grace, which leads man throughout his whole life.
