

## **ABSTRACT**

Social deviance is the behavior that is different from the normal life of most people and the company considered it unacceptable. Therefore, the state as the highest social institutions tries to reduce this behavior especially among children and youth to a minimum. It does so through the establishment of prevention and social worker for youth functions. The profession of social worker is demanding the knowledge of many disciplines, for example the development of children and youth, expressions of social deviance, etc. Curator works with many governmental and nongovernmental institutions. The aim of this work is to determine the role of social worker for youth, compare the theoretical practices in the prevention of social deviance with the options set by practice and the contribution of the curator in the prevention of social deviance.
