

## Abstract in English

Labour economics seeks to understand the functioning and dynamics of the labour market. Labour markets function through the interaction of workers and employers. Workers enter the labour market to seek for maintenance. Organizations demand workers on the labour market. Labour markets are conditioned by market, institutional and social forces. There are many ways of how could labour markets interact with an industrial organization, especially a level of productivity, wages level and a number of labour force. Labour market outcomes have both macro and microeconomic causes and affect behaviour of people and organizations on the labour market.

The main aim of this paper is description of labour market outcomes and review their influence on functioning of industrial organization.
