

Abstract

The bachelor thesis "*Constructs of the Emperor Wilhelm II. after the year 1990*" deals with different theoretical ways of interpretation of the emperor's person, published after the year 1990. The main source for this thesis is the classification, made by Wolfgang J. Mommsen in 1990 in one scientist article. Mommsen defined three different categories, in which the literature can be subsume in. The aim of the bachelor thesis is to verify the validity of the Mommsen's classification for books of different authors, written after the year 1989. The thesis is a historiographical analysis of chosen boooks from chosen authors. The thesis concludes that Mommsen's classification could be applied to chosen literature, but not unreservedly. The thesis modifies the original classification a defines two new categories, which can be used by evaluation of the books about Wilhelm II.
