

Annotation

ČASÁROVÁ, V., The deanery of Turnov in the late Middle Ages, the thesis, The Faculty of Arts of Charles University in Prague, 2011, 81 p., 2 supp.

The thesis is concerned with the development and the state of the church administration in the territory of the deanery in Turnov, primarily in the first half of the fourteenth century and the beginning of the fifteenth century. I have focused on the parish priests, possession of the parish office and their patrons. The chapters are divided according to the three spheres of interest and are developed and evaluated from various points of view. The first part of the thesis deals only with the description of the state of particular parish offices, the second one evaluates the discovered facts and tries to put them into context. A brief summary of the history of the church administration in the stated period in the Czech country comes before all the chapters.

Keywords: Turnov, church administration, deanery, parish office
