

Abstract

Title: Analysis of the beginning and guidance of the attacks, comparison of selected football teams in the World Cup 2010

Objectives: The task of my work is analysis of the beginning and guidance of the attacks, comparison of selected football teams in World Cup 2010. The purpose is to find out, which attacks was the most effective from the point of view of the finishing, which attacks dominated in the selected teams and how to get to their finishing and what was the cause of premature ending phases of attack in World Cup 2010 in the Republic of South Africa. My another aim is to compare teams of Germany and Spain.

Methods: The basic method which will be used to get the data about the beginning and guidance of the attacks is the method of indirect watching of selected football matches in the World Cup 2010 in South Africa. My work is focused on the beginning and follow-up guidance of the attacking actions.

Results: We found out that the most frequent attack in the World Cup 2010 was progressive attack. The most shots on the goal came after progressive attacks too. The most frequently reason of premature ending attacking phases was bad assist. Attacking game manifestation of Spanish and Germans was greatly different. Spanish hold progressive attack. German was the only one team (from my selection) which threatened with fast counter-attack.

Keywords: Football matches, attacking gameplay, finishing, analysis
