Title: Lexicon of Broadcast Workers

Key words: terminology, word-stock, language for special purposes, communication, lexicon, bilingual dictionary, equivalent, radio

Abstract: In the framework of this Bachelor thesis a short bilingual German-Czech dictionary containing basic word-stock of radio workers was compiled. The process of writing database-inputs is summarized and put into the context of the dictionary typology. Some of the dictionary entries created will be partly used in the upcoming Large German-Czech Academic dictionary.
