

## ABSTRACT

The thesis deals with Work Instructions from the Perspective of Text Comprehension. It gives the description of Work Instructions in general, then focuses on two specific kinds of Instructions – Recipes and Consumer Medicine Information. Information about Vocabulary, Syntactics, Semantics, Coreference and Inferences are involved. There is a research of Text Comprehension in the empirical part of this thesis, it is divided into two parts, one for each kind of Instruction. This thesis draws on findings of Czech and foreign linguists.
