Abstract

This bachelor’s thesis deals with misuse of information and communication technologies especially in cyber space. There is a description of bullying in first part which is much related with cyber bullying. It is listed how is possible to hurt – signs of bullying, at first. Bullying development is important in groups.

Another part is about already mentioned cyber bullying. Related phenomena of cyber bullying like cyber stalking, cyber grooming, child grooming and happy slapping. Also kinds of cyber bullying as an instrument how is possible to harm victims.

The last part of the bachelor’s thesis deals with the survey research by questionnaire. The questionnaire examines the ICT ambushes, what is considered by young people as an ambush, how often they spend time on the computer and if they know what cyber bullying means.
