

ABSTRACT

In my theoretical part I deal with a quite new educational issue – ethical education. I mean to emphasise the key importance of ethics for society and I describe ethical education as a school subject. I deal with management operations of leading a change in school curricula. The research survey is focused on obstacles within ethical education implementing. Identification of the obstacles is the output as well as a model procedure of ethical education implementing.

KEY WORDS

Globalization, social atmosphere, actual atmosphere, leading of a change, style of leading, change implementing
