

## **Abstract**

The main goal of this diploma thesis was to introduce the personality of Kryštof Popel younger of Lobkowitz (1549–1609) based on his diaries, which came from the years 1602–1604. The edition of these diaries completes the whole thesis. Topics of the chapters are based on notes by Kryštof – they inform us about Lobkowitz's private and public life, and also about his patronage.

The presented text also allows the reader to look into everyday life of the nobility, which took place in Prague palaces at the beginning of the seventeenth century.
