

Summary

This diploma paper focuses on the area of environmental NGOs in Pardubice region. The main goal is to map chosen environmental NGOs and choose suitable environmental centers, which should have become the part of network of environmental NGOs in Pardubice region. The integral part of this work is the survey of ten chosen environmental NGOs, which finds out present state and possibility of their development. Theoretical part defines individual parts, which are part of the survey and describes attitude of Pardubice region to NGOs, its conception EESE (environmental education, study and enlightenment), activity of the regional linkman of EESE and present situation of environmental NGOs in Pardubice region. In the empirical part there are described the basic information of individual NGOs, analysis of questionnaires and interviews of surveyed NGOs and general summary. The new informations from the survey and evaluated achieved aims are placed at the end of the work.
