

Abstract

This bachelor work is generally focused on spatial and strategic planning as well as their common bond. Using the literature review are shown and explained basic concepts, which can be in the field of spatial planning or strategic found. This paper also describes how they may be related to both documents and and conversely, where they differ. The research is based on verbal text analysis and comparison of the two documents. There are also links to these spatial and strategic plans of Lázně Bohdaneč near Pardubice. In a few specific cases, it is shown how both types of planning of cooperate. Finally, these links are confirmed.
