

REPORT OF DIPLOMA THESIS

Leadership's name:

Phdr. Tereza Nováková, Ph.D.

Student's name:

Bc. Farah Droubi

Title of diploma thesis name:

Pes planus in children: its implications and the influencing factors on its development

Goal of thesis:

The thesis is a literary review, reviewing books, journals and articles retrieved in the period from early 2012 to mid 2013.

1. Volume:

* pages of text	77
* literature	118
* tables, graphs, appendices	8 tables, 16 figures in 2 appendixes

2. Seriousness of topics:

	above average	average	under average
* theoretical knowledges	x		
* input data and their processing	x		
* used methods		x	

3. Criteria of thesis classification

	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	x			
independence of student during process of thesis	x			
logical construction of work	x			
work with literature and citations	x			
adequacy of used methods	x			
design of work (text, graphs, tables)	x			
stylistic level	x			

responds to the requirements for the diploma thesis

4. Usefulness of the thesis outcomes:

above average average

5. Comments and questions to answer:

The presented master thesis is exhaustively elaborated using the recent sources of many distinguished journals and internet media. It brings the recent summary of the problem of pes planus in childhood from diagnostic and partly in therapeutic point of view. The subject matter is very well critically evaluated. Could you compare the options of the evidence based evaluations of functional examination of children flat foot? What would be your proposal of research plan design in this issues?

6. Recommendation for defence:

yes no

7. Designed classificatory degree

excellent

Date: 23.9.2013
