

**Abstract:**

Bachelor thesis „Bibliotherapy with children in children’s homes“ is about using the bibliotherapy for children in children’s homes. The main target is sum up all theoretic information of bibliotherapy and children’s home and then makes a suggestion of suitable bibliotherapeutics techniques and literature for children, who live in children’s homes. This project should use as a inspiration for specialist and all people, who would like to use bibliotherapy with abandoned children. The secondary target is to determine the availability of literature and materials related to bibliotherapy.

The project is divided into three chapters. The first chapter deals with bibliotherapy, its theory and examples of application in practice in abroad and in the Czech Republic. The second chapter focuses on the children's homes and in particular the problems of children, who place there. The final chapter presents a proposal bibliotherapeutics techniques, tailored directly to the specific problems of children in children’s homes.

The result is a proposal bibliotherapeutics techniques and literature focused on specific problems of children in children’s homes.
