ABSTRACT:

This bachelor thesis analyses which possibilities public elementary art schools make use of when getting finance for their running and development. In more detail the thesis deals with the support of these schools by their founders, if the schools carry on complementary activities, if they were forced to increase payments for education, if they have sponsors, if they were granted gifts or whether a civic association operates at school. It has been also analysed to which extent the school management is informed about possibilities of drawing subsidies from grant programmes announced by the Ministry of Education, Youth and Sports, by local administrative units or by the EU. In theoretical part of the thesis these possibilities are described from general point of view. In the research part it has been analysed questionnaire survey, dealing with the concrete results regarding the monitored fields of financing, realized in public elementary schools in the Czech Republic.
