ABSTRACT:

In the theoretical part of this thesis I have summarized definitions of talent, creativity, functional literacy and fine motor skills. In the practical part, I informed about the results of the research conducted using functional literacy tests (which I then modified so that they can be used by children who cannot read) and Torrance creativity tests. The aim was to identify and describe progress and development of selected skills in a sample of talented first graders.

KLÍČOVÁ SLOVA:

gifted child, functional literacy, fine motor skills, creativity, hobbies
