

The problem of guilt from Martin Buber's and Karl Jaspers' perspective. My diploma work deals with the problem of guilt from the perspectives of Martin Buber and Karl Jasper. Firstly I describe the lives of the existential philosophers Martin Buber and Karl Jasper whose own life experiences played a vital role in formulating their opinions on the problems of guilt. I then proceed to state the ways of dealing with guilt from the perspective of Buber, and later Jasper, and finally I compare their perspectives of guilt.
