

**ABSTRACT:**

The aim of this bachelor thesis is to describe architectural and historical development of the Star Summer Palace in Prague. The project designed by Ferdinand of Tyrol will be contrasted with individual architectural phases which were participated by Bonifac Wolmut ad. Using preserved Viennese projects, which created in 1555 Ferdinand of Tyrol, is a detailed description of the object. It will be mentioned himself Archduke Ferdinand of Tyrol. On the basis of it will be possible to assess the current state of architecture with its original project.
