

Průběh obhajoby:

namaria Remete introduced briefly the theme, structure, theory, and major finding of her thesis. The opponent and both supervisors resumed their reviews. They expressed strong reservations about the small number of interviews and the way of conducting them, weak formulation of research questions, and the lack of stronger contextualisation. They found theoretical parts too extensive, highly selective, and not connected with the empirical research. The committee focused on serious shortcomings regarding the rules and standards of academic writing. Besides cases highlighted by reports during the defence, other cases of unacceptable citing were discovered. The candidate did not defend her quotation practice.
