

Abstract

The thesis deals with waste management. The aim of the thesis is to describe and evaluate present waste legislation including amendments to several waste management institutions and comparison to waste legislation of European Union. The thesis is divided into eight chapters. The first chapter focuses on introducing into general range of waste management. The second chapter deals with sources of law, both national and international. The third chapter describes the central term of waste management and of the thesis, i. e. waste, and presents its definition, exceptions from the definition and exception from regulation of the Waste Act 185/2001. The fourth chapter focuses on the waste hierarchy and explains it. The fifth chapter includes the waste management plans, and presents them in accordance with their importance in the hierarchy of waste management plans. The chapter explains content and meaning of the waste management plans. The sixth chapter refers subjects to the obligations given by Waste Act . At the end of the sixth chapter author mentions the matter of legal liability in case of the subjects being in breach of the obligations. The seventh chapter deals with all operations with waste, and divides them into waste prevention, means of waste handling according to waste hierarchy and other waste handling. The eighth part concludes waste legislation and its amendments presented above and compares it to legal regulation of waste handling of European Union.
