

## **Abstract**

Bachelor thesis titled „Turtles“ (*Testudines*) – their occurrence and breeding in the Czech Republic was primarily conceived as a research. The objective of this study is to create an information unit about turtles and is divided into several specific areas such as history, origin, anatomy and physiology, occurrence, breeding and diseases. The thesis compares the knowledge of turtles from available resources.

**KEY WORDS:** reptiles, turtle, breeding, red-eared slider (*Trachemys scripta elegans*)
